Codeforces LeetCode CodeChef

Professional Summary

Third-year Computer Science (2028 pass-out) student at BIT Mesra with strong fundamentals in data structures, algorithms, and object-oriented software design, backed by hands-on experience building and deploying production-grade full-stack applications used by real users. Proficient in Python, C++, and JavaScript with practical exposure to REST API and protocol design, client-server architecture, authentication and security mechanisms (JWT, OTP, bcrypt), automated testing with Postman, and cloud deployment. Strong problem-solver with 500+ DSA problems solved across competitive programming platforms and a track record of independently owning projects end-to-end.

Education

Birla Institute of Technology, Mesra

B.Tech in Computer Science and Engineering

GPA: 8.99 / 10 — Awarded **G.P. Birla Scholarship (2x)** for academic excellence

Ranchi, Jharkhand

Aug 2024 – Jun 2028 (Expected)

Competitive Programming

LeetCode – Rating: **1635** (leetcode.com/u/codebot216)

CodeChef – 2 Star, Rating: **1451** (codechef.com/users/codebot216)

Codeforces – Rating: **1126** (codeforces.com/profile/sauravsonu216)

Solved **500+ DSA problems** across arrays, graphs, dynamic programming, trees, and greedy algorithms.

Experience

Freelance Web Developer

Bachpan School, Gumla, Jharkhand

2024

bachpangumla.com

- Designed and developed a fully responsive school website in React.js and TailwindCSS, currently live and actively serving the Bachpan school community for admissions and parent inquiries.
- Managed the complete project lifecycle independently – from client requirement gathering and UI/UX design to production deployment, troubleshooting, and ongoing post-launch maintenance.
- Ensured cross-device consistency across mobile, tablet, and desktop with a clean, accessible interface, testing across browsers to catch and debug edge cases.

Projects

School Cart – Full-Stack E-Commerce Platform

Ongoing engagement with Skool Box

React.js, Node.js, Express.js, MongoDB, Firebase, Razorpay

skool-box.vercel.app

- Independently built a **production-grade MERN e-commerce platform**, now live under an ongoing engagement with **Skool Box**, processing real user transactions with live payment processing.
- Designed **50+ RESTful API endpoints** on a modular **MVC architecture** (Routes, Controllers, Middleware) for scalability and clean separation of concerns.
- Built **multi-layer security** – JWT access/refresh token rotation, bcrypt hashing, Firebase Phone OTP verification, and role-based access control for Admin/User roles.
- Integrated **Razorpay** payments with server-side signature verification, supporting online payment and COD with automated refund initiation.
- Modelled **5 MongoDB schemas** with Mongoose, including per-size inventory tracking with atomic stock adjustments across orders, cancellations, and payment failures.
- Tested and debugged** all endpoints via Postman before release, ensuring reliable production behavior.

Technical Skills

Languages: Python, C++, C, JavaScript

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Frontend: React.js, HTML5, CSS3, TailwindCSS, Context API

Backend: Node.js, Express.js, REST API and Protocol Design, JWT, bcrypt

Database: MongoDB, Mongoose

Tools and Platforms: Git, GitHub, Postman (API Testing and Debugging), Cloudinary, Firebase, Razorpay, Nodemailer, jsPDF, Vercel, Render

Achievements

- Built and deployed **2 live production projects**; **School Cart** now engaged by **Skool Box** as their live e-commerce platform.
- Solved **500+ DSA problems** across LeetCode (1635), CodeChef (1451), and Codeforces (1126).
